

Movie App:

a web application that will show the most popular and most rating movies. This app is the web version of movie app android application here => <https://www.youtube.com/watch?v=IzGF-u7KC0g&feature=youtu.be>

With more Features.

Requirements: -

- Allow the user to see all the popular movies
- Allow the user to see most rated movies
- Enable the user to see movie details when clicked
- Enabling the registered users to add a specific movie to their favorite movie list

-what I tried to do:

- * I tried to follow the same file structure that is described in angular guide style. [see page 2]
- * I tried to make each component have one responsibility only.

What I did:

- create component to show movie.
- create list movie component to show a list of movies.
- create the following services [getMostPopularMovie, getMostRatingMovie, getMovieDetails]

Things that are not finished:

- create login, signup component.
- enable add to favorite button.
- using caching in both [backend, front end].

The Lion King

The Lion King

A young lion prince is cast out of his pride by his cruel uncle, who claims he killed his father. While the uncle rules with an iron paw, the prince grows up beyond the Savannah, living by a philosophy: No worries for the rest of your days. But when his past comes to haunt him, the young prince must decide his fate: Will he remain an outcast or face his demons and become what he needs to be?

Release Date : 1994-05-07

Rating : 26.073
